Ryaan Sayegh

Profile

Executive in tech, startups and AI with a history of developing innovative softwares. Skilled in project execution and bringing ideas to life. Passion lies in creating digital projects - and providing my technical skills to help projects progress in their path.

Employment History

Chief Technology Officer (CTO), Hollo AI

JULY 2024 — PRESENT

Led the creation and development of Hollo's AI conversational AI technology, a leading platform in AI technology for personalized AI twins, revolutionizing digital engagement.

- Oversaw the entire technical department, leading a cross-functional team of 13 to develop and integrate innovative features for Hollo.
- Created and implemented the concept of AI twins for Hollo, overseeing all technical planning and execution from scratch.

Chief Executive Officer (CEO), Residents AI

JULY 2023 — PRESENT

Conceptualized a community management SaaS for cities to streamline engagement, inspired by winning an RFP for paper survey creation for the City of San Francisco.

- Conceptualized the entire platform and developed comprehensive design and development plans, incorporating insights into city requirements for school and community engagement.
- Secured two clients during the development phase of Residents AI: Sawa, a rapidly growing Arab diaspora group, and Chinese Union, the largest Chinese student organization in North America.

Chief Executive Officer (CEO), Skew

DECEMBER 2021 — PRESENT

Founded a software development company and learned to manage operations, lead a team, and delivered projects through hands-on experience and self-directed learning.

- Secured the City of San Francisco as our first client, developing segments of their traffic light management software—still serving them three years later.
- Drove revenue growth over the last three years while expanding the team from 3 to 12 full time employees and securing further government contracts.

Founder, Grade Hero

AUGUST 2017 — PRESENT

Created a double-blind, two-way marketplace to facilitate academic task collaboration, connecting high-achieving students with peers seeking support for various assignments.

- Systemized the entire business by appointing team leaders to review tasks and designing incentive structures that naturally maintained quality.
- Expanded the company into 20+ countries and served over 1,000 clients. Profitable from inception, with revenue at 35x by the third year.
